

Competency Australia

Capability Statement

Competency Australia is a Registered Training Organisation (RTO Code 40647) specialising in the provision of high quality training and assessment solutions to the rail sector.

Courses

At Competency Australia we pride ourselves on providing relevant, interesting training. We include case studies, practical exercises and role-plays to ensure that learners get the most out of the experience.

We deliver courses in the following areas :

- ◆ Rail Operations Management
- ◆ Railway Signalling
- ◆ Incident Investigation, including ICAM
- ◆ Communication Systems
- ◆ Safety Systems, including international Engineering Safety Management (iESM)
- ◆ Electromagnetic Compatibility (EMC)
- ◆ Competence Management Systems
- ◆ Signal Safeworking (ST43/ST144)

We also tailor courses to client's needs.

Rail Safety Worker Assessment

Competency Australia's assessors and subject matter experts are approved to conduct Rail Safety Worker Assessments for the following organisations :

- ◆ Australian Rail Track Corporation (ARTC)
- ◆ Metro Trains Melbourne (MTM)
- ◆ Transport for New South Wales (TfNSW)

We assess designers, engineers, technicians, signal electricians and project managers.

Our People

Our highly skilled team of educators is made up of experienced engineers, rail operations experts and safety professionals.

Facilities

Our custom built Broadmeadow training centre is one-of-a-kind and includes a complete operational railway interlocking, with track circuits, signals and points.

Nationally Recognised Training

Competency Australia provides the following nationally recognised qualifications :

NATIONALLY RECOGNISED
TRAINING

TLI50615

Diploma of Rail Operations Management

UEE41211

Certificate IV in Electrical - Rail Signalling

We also offer stand-alone units of competency :

- TLIF2080 - Safely Access the Rail Corridor
- TLIL5066 - Apply Rail Resource Management
- TLIW5001 - Apply Rail Communication Systems
