

## Course Information

## Ruggedcom First Line Maintenance

### Description

This short course provides maintainers with the knowledge and tools they need for first line maintenance of Ruggedcom equipment in railway signalling locations.

### Duration

Ruggedcom FLM is a one day course. This includes theory, practical demonstrations, "hands on" practice and assessment.

### Learning Outcomes

- ◆ Understand what the equipment does
- ◆ Identify ports from circuit book
- ◆ Understand front panel indications
- ◆ Learn how to download logs
- ◆ Use serial port cables and connections
- ◆ Optical fibre connections and cleaning.
- ◆ Understand and test ring connections.

### Gain Confidence

The Competency Australia learning lab has equipment set up in a signalling environment.

Familiar surroundings and equipment but in a safe environment where mistakes help you learn, with no impact on a live railway.

You will find and clear faults in our training lab as you learn, using simple tools and your laptop

### More Information
