

**Competency
Australia**

Solve the regulatory compliance puzzle!

Recent years have seen major changes in Australian rail regulations, including the introduction of the Office of the National Rail Safety Regulator (ONRSR) and the adoption of the rail safety national law.

Whether you are fresh to the industry or a seasoned veteran, a design engineer or a rail operations manager, **you** have specific obligations under the Rail Safety National Law.

Are you confident you understand them?

Course Content

Gain an appreciation of the underpinning principles - and the implications for your day to day activities.

The course covers :

- Rail industry terminology
- Rail regulatory framework
- Rail safety management systems
- Legislation and its impact on railway operations and management, rail safety and systems interfaces
- Duty holders and their duties under rail safety legislation
- Current national and international standards

Regulatory requirements are brought to life through face to face training with multiple case studies and practical exercises.

This one-day course provides learners with knowledge of current rail regulatory requirements and the skills to apply this knowledge in the workplace.

Nationally Recognised Training

On successful completion of the course assessment, you will be issued with a Statement of Attainment for the following unit of competency :

TLIF4100

Identify and meet rail safety regulatory compliance requirements.

Start earning your Diploma!
