

Course Information

Working in Live Signalling Locations

Pre-Requisites

- TLIF2080 – Safely Access the Rail Corridor (SARC)
- CPCCOHS1001 – Work Safely in the Construction Industry

About the Course

Working in Live Signalling Locations is a half day course. This includes practical demonstrations, course workbook, final assessment, and a certificate upon successful completion of the course.

The following topics are covered:

- An introduction to the ARTC Network, including policies, procedures, legislation and regulations
- Basic electrical concepts
- Basic signalling concepts
- Planning work in live locations, including communication and risk assessments
- Accessing signalling locations, including vehicle use, keys and location types
- Working in the live location – hazards and precautions
- Consequences of unsafe actions, including case studies of previous incidents
- What to do in the case of an incident.

Course Outcomes

On the successful completion of this course, you will have learnt how to work safely in a live signal location, including the following:

- Understand and apply the correct procedures for site access
- Identify and mitigate the personal risks involved when working in a live location, including electrical hazards.
- Identify and mitigate the signalling infrastructure risks involved when working in a live location.
- Leave the signalling location in a clean and tidy state.
- Deal with unplanned events
- Apply the appropriate responses should there be accidental interference with the signalling infrastructure.

Training Location

Competency Australia

63 Broadmeadow Rd,
Broadmeadow NSW 2292.

We can also customise and deliver the training at your workplace.
